

TITLE  
SUPPRESSION OF SPECIFIC CLASSES  
OF SOYBEAN SEED PROTEIN GENES

ABSTRACT

5           This invention concerns the construction of transgenic soybean lines  
wherein the expression of genes encoding seed storage proteins are modulated to  
effect a change in seed storage protein profile of transgenic plants. Modification  
of the seed storage protein profile can result in the production of novel soy protein  
products with unique and valuable functional characteristics.
